Diabetic Education

Discover a journey towards diabetes well-being with our expert. Gain essential diabetes-related knowledge, skills, and confidence. Learn to make informed decisions, solve challenges, set personal goals, and manage emotions and life's demands.

Research highlights the power of education

Studies reveal that individuals spending over 10 hours in Diabetes Self-Management Education and Support (DSMES) within 6-12 months, or participating regularly, experience noteworthy benefits. Reduced mortality rates and improved A1C levels were observed among those engaged with a Certified Diabetes Care and Education Specialist, compared to those with limited interaction.

Topics covered
- Diabetes understanding
- Healthy eating
- Active lifestyle
